

Dear Terri,

Attached please find a letter from the indigenous and recreational members of Peacemakers. This summary is from a meeting held in late August that was called as a result of growing conflict on the river. It contains some requests of DFO to implement some regulations but was also about the growing attraction to recreational fishers from terminal abundances. These abundances are a result of conservation measures implemented in salt water. We believe this trend will only increase and that plans need to be developed to deal with these challenges. We hope you agree.

Please feel free to be in touch and we hope to see you and your staff engaged in discussions on how to deal with future, intense, terminal fisheries.

Cheers, Dave
